

About.

This elective is an Advanced Pharmacy Practice Experience that will utilize the student pharmacist, to work with an assigned community pharmacy, to develop and implement harm reduction services to address opioid and substance use disorders. These services will be designed to meet the needs of the pharmacy's community.

Our Info

APPE Elective

Opioid Stewardship &
Service Development

Why choose this APPE?

This rotation will develop skills to assist in expanding the students' network of professional contacts, leadership and analytical skills, project management, opioid stewardship knowledge, innovation, and best practices for opioid-related risk mitigation principles and strategies.

Objectives:

- Identify the specific opioid-related, clinical service needs, and analyze the available resources for the assigned community pharmacy.
- Develop a plan for clinical service implementation that fits the pharmacy's needs and resources.
- Select or produce materials needed by the pharmacy staff for providing the clinical service.

Designed for:

- Those with interest in substance use disorders,
- Dual majors (MSPH or MBA),
- Those pursuing a residency and desire 'service development skills', and
- Those interested in progressive or advanced community practice.

01. Where:

NCAP will serve as the primary preceptor of record, but the student will work with a chosen NC community pharmacy to design and implement a clinical service.

02. When:

Rotations will be one month long during the academic year between May 2023 and April 2024. Rotations are available during any month except for December 2023.

New service!
