

Help us regulate Pharmacy Benefit Managers (PBMs) to lower your medication costs and keep our doors open!

Do you think your insurance company should tell you which pharmacy you can use or that you must use their *own* pharmacy?

Do you think PBMs should profit off your medication even though they never touch it?

Do you think we should be paid less than our cost for medications?

Do you think we should be paid less than other pharmacies for the same medications?

Do you want to see us close our doors and all the services we provide disappear?

**If you
said no.**

Take 1 minute to call your senator today and ask them to pass House Bill 246 so that we and other independent pharmacies across NC are not forced out of business by big, powerful & unregulated PBMs.
