

# Support H 246

## What this bill will do:

- Give the Department of Insurance authority to enforce PBM laws;
- Require PBMs to more fairly reimburse pharmacies;
- Eliminate ‘spread pricing’;
- Prevent PBMs from mandating use of their own mail-order pharmacy; and
- Address PBM specialty pharmacy monopoly

## What is important to know about this bill:

- Based on data from other states, passing this bill **will NOT increase costs** for patients or NC.
- Passing this bill **will NOT prevent patients from choosing** to use mail-order pharmacies. It only prevents PBMs from requiring patients to use mail-order or a specific pharmacy.
- Passing this bill **will NOT lead to delays in care**. In fact, PBMs prevent health-system pharmacies from filling specialty drugs for their own clinics. This bill will improve access which prevents delays in care.
